

Setting up your Wi-Fi System with the App

The app allows you to easily manage your home or small business Wi-Fi network within minutes. Download the app and take control of your Wi-Fi network today!

1

Download the app. You can search either the Apple App Store or Google Play Store for: 'CommandIQ®', then install it on your mobile device.

2

Select 'Sign Up' or 'Log In' to set up your router to access Wi-Fi controls and protection.

3

Select "Setup or Replace Router" to set up your new router model.

5

Now that your new router is set up, you can set up your Wi-Fi network.

Update Wi-Fi Network Name and Password

- Press "My Network" on the Home screen.
- Select the network you wish to update the name or password for.
- Press "Edit" and update your information.

Note: changing your SSID or password will require you to reconnect all your wireless devices previously connected to that network.

Run a Speed Test

- Select "My Network" from the Home screen.
- Select "Bandwidth Test".
- Select "Run Test".

The speed test will first run between the GigaSpire BLAST and the Internet and then will conduct a speed test between any mesh units and the GigaSpire BLAST. Results will show as a notification in the app and update on the screen.

View Devices on Your Network

- Select "Things" from the Home screen.

Follow the next steps for new router set up.

Note: Manually enter device details if scanning does not work.
